The Lami-Blocks™

You're limited only by your imagination as to what you can create with our Lami-Blocks™. The woodturner in you sees bowls, platters, candle holders, or salt and pepper shakers. The woodworker

in you wants to slice these blocks into boards to make square boxes, inlays, or panels for small door or drawer fronts. Send us photographs of your Lami-Block™ creations and if we use these in our website, we will send you a free gift!

We use exotic hardwoods of premium quality from around the world in the construction of these blocks. At present we are using Padouk, Purpleheart,

Yellowheart, Canary Wood, and Baltic Birch plys in the construction. The kiln dried hardwoods are cut to desired size and laminated under high pressure using high strength adhesives. The formed blocks are surfaced to give smooth sides. Some are sliced and reglued for a more elaborate lamination. At this time we are producing six different types of Lami-Blocks™ in various dimensions.
